

Product: Defender Seat Belt Bypass (Slow Key Mod)

Disclaimer: Seat belts should be worn at all times.

Instructions:

- Using the supplied screws clamp the key mount under the front center seat as shown in the picture below. Unplug the seat belt sensor plug and plug in the end from the harness.

- If you didn't order the seatbelt bypass option plug in the other end of the harness to the seat belt sensor side of the OEM wiring. If you did the bypass will already be installed, as shown above.
- Key functions
 - On Position without bypass- machine will function as it did from the factory
 - On Position with bypass- Machine will always think seat belt is fastened and not limit speed.
 - Off Position- Machine will always think the seat belt is un-fastened
 - This feature will allow you to limit the speed as if the seat belt was un-fastened but have the driver fastened by the seatbelt.
 - The key can also be removed if in this position.
