

Product: Outlander Snorkel Horn Cover

Disclaimer: This Product is not intended to keep 100% of water and debris out of your snorkels. This product is intended to not get clogged with dirt and debris as the stock screen cover does limiting air flow.

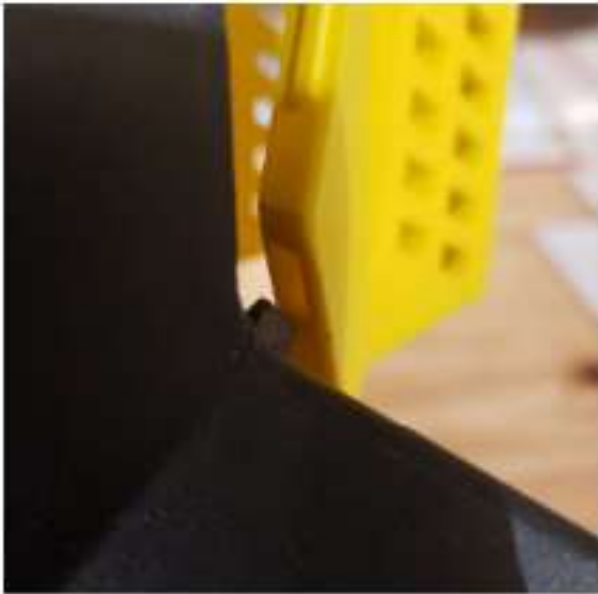

Instructions:

- Remove the stock snorkel horn mesh screen
- Slide the horn cover into place making sure that the edges mount as flush as possible. Line up the tabs at the bottom of the horn with the slots in the cover and the holes at the top of the snorkel horn line up with the mounting holes in the horn cover.

Thank you for your purchase.

For a list of more products we offer please visit marqcadeng.com or message us on facebook at marqCAD Engineering if you don't see what you are looking for on the website.

- Install the supplied screw and washers as seen in the picture below. Do not overtighten these as it will cause the part to break in most cases. It takes very little tightening to get the covers to be sturdy for this design.

Thank you for your purchase.
